The Humans are Trying to Kill Us and It Needs to End

[MOLINE—Friday, March 22] Zombies held a DED Talk to speak about the issues affecting them then followed by hacks to help them survive. Sadly, at the meeting the “zombie” speaker was actually a human disguised as a zombie, so he could kill a number of zombies.

At the Tax Slayer Center, zombies gathered to hear hacks to help them survive the human apocalypse. Zombies are being killed for feeding on humans, but humans are how they survive

“It is the human apocalypse we only rose from the dead but everywhere we go there are hordes of humans with their torches and shovels and guns well I hacked death”

Zombies are being killed and these hacks are going to save them from extinction. They are being shot in the head and instead of getting shot in the head they should make sure they are getting shot in the body then they will not die again. Also find a human to eat and kill them before so they won’t fight back or shot.

“Besides being safer for you this creates more food if you start eating the humans will turn into zombies and then you’re just eating another zombie. Seriously though we not eat each other it’s disgusting we should do the opposite share.”

For the zombies to survive another hack is to disguise themselves as humans to make sure the look as if they are one with the humans. But with this human pretending to be a zombie everyone has to help to make sure the zombies are the ones in control to help the zombie race and for us all to live in the human apocalypse.

DED is a nonprofit devoted to spreading ideas, usually in the form of short, powerful talks (18 minutes or less). DED began in 1984 as a conference where Technology, Entertainment, and Design converged, and today covers almost all topics—from science to business to global issues—in more than 100 languages.
